

# Assignment Web Similarity Analysis

Generated on 2025-03-26 19:03:11

## Executive Summary

Overall Web Similarity Score: 10%

**Assessment:** Low overall similarity. The assignment primarily focuses on a specific project proposal, while the source texts discuss broader topics of AI, plagiarism detection, and education. A few common phrases appear, but these are generally related to the subject matter and not indicative of plagiarism.

**Conclusion:** The assignment demonstrates original work. The overlapping phrases are generic terms related to the project topic and are not considered plagiarism. The student's specific project description, team details, and university information are unique. No evidence suggests improper use of external sources.

## Web Sources Analyzed

## Detailed Content Matches

### Match 1 - Similar Content (70%)

**Assignment:** AI Plagiarism Detector Tool  
**Source:** https://copyleaks.com/  
**Source Text:** AI Content & Text Authenticity Detection

### Match 2 - Similar Content (75%)

**Assignment:** AI Plagiarism Detector Tool  
**Source:** https://www.insidehighered.com/news/tech-innovation/artificial-intelligence/2024/06/12/another-ai-plagiarism-detector-comes-edtech  
**Source Text:** Another AI plagiarism detector comes on the edtech scene

### Match 3 - Similar Content (90%)

**Assignment:** Plagiarism Detection  
**Source:** https://www.grammarly.com/plagiarism-checker  
**Source Text:** Plagiarism Checker

### Match 4 - Common Knowledge (0%)

**Assignment:** User friendly Interface  
**Source:** None  
**Source Text:** N/A

### ***Match 5 - Common Knowledge (0%)***

**Assignment:** Machine Learning and Natural Language Processing

**Source:** None

**Source Text:** N/A

---

### ***Match 6 - Common Knowledge (0%)***

**Assignment:** Document and Format Support

**Source:** None

**Source Text:** N/A

---

### ***Match 7 - Common Knowledge (0%)***

**Assignment:** User Authentication

**Source:** None

**Source Text:** N/A

EG/2020/4210 - Sewwandi BTI

EG/2021/4424-Balasooriya JM

EG/2021/4432-Bandara KMTON

EG/2021/4433-Bandara LRTD

We envision developing a web application that plagiarism detection with the advanced features.

Advanced test comparison :

Exact matching ,Paraphrase Detection

Content Originality :

Providing the originality of the content as a percentage.

User friendly Interface :

Dashboard, Report Generating

Machine Learning and Natural Language Processing

Using the advanced of the ml algorithms and the NLP techniques to understand the context.

Review and Resubmission

Document and Format Support:

Accesses to upload the various file types (pdf,doc,docx)

User Authentication

We believe this project will greatly benefits to the students as well as the lecturers to their academic works with having high confidence of their academic papers.

Your expertise and feedback would be invaluable as we embark on this journey.

Please let us know your thoughts if we have approval to proceed.

Thank you for your time and consideration.

Best Regards,

Bandara KMTON (EG/2021/4432)

# Analysis Methodology

---

**Web Similarity Analysis Method:** This report analyzes the similarity between a student assignment and web content using multiple approaches:

1. **Basic similarity analysis** using TF-IDF vectorization and cosine similarity metrics to calculate statistical similarity between texts.
2. **Advanced semantic analysis** using Google's Gemini AI to identify conceptual similarities, common phrases, and potential plagiarism patterns.
3. **Source verification** by analyzing multiple sources to distinguish between common knowledge and unique content.

## Interpretation Guide:

- 0-15%: Very low similarity - Likely original content
- 16-30%: Low similarity - Contains common phrases but largely original
- 31-50%: Moderate similarity - May contain some paraphrased content
- 51-70%: High similarity - Contains substantial similar content
- 71-100%: Very high similarity - Significant portions may be unoriginal

---

*Disclaimer: This automated similarity analysis provides an approximation of content similarity against web sources. Results should be interpreted by a human reviewer for context-appropriate assessment. Common knowledge, standard phrases, and coincidental matches may be flagged and require human judgment.*
