

# Assignment Web Similarity Analysis

Generated on 2025-03-26 21:31:28

## Executive Summary

Overall Web Similarity Score: 10%

**Assessment:** Low overall similarity. The assignment primarily describes a proposed project and contains elements that are common in project proposals or discussions of plagiarism detection tools. A few phrases appear in contexts related to plagiarism detection across the web, but these are generally generic in nature.

**Conclusion:** The assignment demonstrates originality. The identified similarities relate to the common terminology used when discussing AI plagiarism detection software. Features like "user authentication" and "document format support" are standard functionalities and not indicative of plagiarism. The student's description of their proposed project, including specific functionalities and the academic context, appears to be their own work. No evidence suggests substantial copying from the provided web sources.

## Web Sources Analyzed

## Detailed Content Matches

### Match 1 - Similar Content (60%)

**Assignment:** AI Plagiarism Detector Tool  
**Source:** https://copyleaks.com/  
**Source Text:** AI Content & Text Authenticity Detection

### Match 2 - Similar Content (65%)

**Assignment:** AI Plagiarism Detector Tool  
**Source:** https://www.insidehighered.com/news/tech-innovation/artificial-intelligence/2024/06/12/another-ai-plagiarism-detector-comes-edtech  
**Source Text:** Another AI plagiarism detector comes on the edtech scene

### Match 3 - Similar Content (90%)

**Assignment:** Plagiarism Detection  
**Source:** https://www.grammarly.com/plagiarism-checker  
**Source Text:** Plagiarism Checker

### Match 4 - Common Knowledge (0%)

**Assignment:** Document and Format Support: Accesses to upload the various file types (pdf,doc,docx)

Source: N/A  
Source Text: N/A

---

**Match 5 - Common Knowledge (0%)**

Assignment: User Authentication  
Source: N/A  
Source Text: N/A

EG/2020/4210 - Sewwandi BTI

EG/2021/4424-Balasooriya JM

EG/2021/4432-Bandara KMTON

EG/2021/4433-Bandara LRTD

We envision developing a web application that plagiarism detection with the advanced features.

Advanced test comparison :

Exact matching ,Paraphrase Detection

Content Originality :

Providing the originality of the content as a percentage.

User friendly Interface :

Dashboard, Report Generating

Machine Learning and Natural Language Processing

Using the advanced of the ml algorithms and the NLP techniques to understand the context.

Review and Resubmission

Document and Format Support:

Accesses to upload the various file types (pdf,doc,docx)

User Authentication

We believe this project will greatly benefits to the students as well as the lecturers to their academic works with having high confidence of their academic papers.

Your expertise and feedback would be invaluable as we embark on this journey.

Please let us know your thoughts if we have approval to proceed.

Thank you for your time and consideration.

Best Regards,

Bandara KMTON (EG/2021/4432)

# Analysis Methodology

---

**Web Similarity Analysis Method:** This report analyzes the similarity between a student assignment and web content using multiple approaches:

1. **Basic similarity analysis** using TF-IDF vectorization and cosine similarity metrics to calculate statistical similarity between texts.
2. **Advanced semantic analysis** using Google's Gemini AI to identify conceptual similarities, common phrases, and potential plagiarism patterns.
3. **Source verification** by analyzing multiple sources to distinguish between common knowledge and unique content.

## Interpretation Guide:

- 0-15%: Very low similarity - Likely original content
- 16-30%: Low similarity - Contains common phrases but largely original
- 31-50%: Moderate similarity - May contain some paraphrased content
- 51-70%: High similarity - Contains substantial similar content
- 71-100%: Very high similarity - Significant portions may be unoriginal

---

*Disclaimer: This automated similarity analysis provides an approximation of content similarity against web sources. Results should be interpreted by a human reviewer for context-appropriate assessment. Common knowledge, standard phrases, and coincidental matches may be flagged and require human judgment.*
